	Latão e bronze / Brass and bronze / Latón y bronce	até 200	240	0,1 - 0,3	BF 41	150	0,2 - ,04	BF 41	0,3 - 0,5	BF 30	75	
Ligas de zinco fundido / Zinc alloys cast / Aleaciones de Zinc fundido	Ligas de alumínio fundido / Cast aluminium alloys / Aleaciones de aluminio fundido		240	0,1 - 0,3	BF 41	150	0,2 - ,04	BF 41				
	Plástico e borracha dura / Plastic and hard rubber / Plástico y gomas duras		400	0,5 - 0,8	BF 41	285	0,7 - 1,2	BF 30				
	Fibras / Fibers / Fibras		200	0,5 - 0,8	BF 41	140	0,7 - 1,2	BF 30				
Porcelana / Porcelain / Porcelana	Porcelana / Porcelain / Porcelana		20	0,5 - 1,0	BF 41	10	0,7 - 1,2	BF 30				
	Mármore / Marble / Mármoles		65	0,5 - 1,0	BF 41	55	0,7 - 1,2	BF 30				
	Granito / Stone / Granito		12	0,5 - 1,0	BF 41	7,5	0,7 - 1,2	BF 30				

Os valores de velocidade de corte apresentados são médios, e servem de base para determinação de velocidade de corte mais adequada para uma dada aplicação. Surface speeds listed are average values and should be used as a guide to choose the best speed for a particular application. Los valores de velocidad de corte indicados son medias, y sirven como base para la determinación de una velocidad de corte mas adecuada para una dada aplicación.

TORNEAMENTO Turning / Torneado		ISO	ANSI	Com Revestimento Coated Com Recubrimiento	Classes Complementares Complementary Grades Clases Complementarias	Aplicações Applications / Aplicaciones	
P Aço, aço fundido, aço inoxidável e aço liga. Steel, cast steel, stainless steel and alloy steel. Acero, acero fundido, acero inoxidable, acero aleado.	P01	C8					MC 7435 (P15 - P50 - Coated) Finishing and roughing of forged steel, cast steel and nodular cast iron with long chips. High cutting speeds and moderate feeds. Good toughness and wear resistance. Universal grade for machining of steel. MC 7425 (P01 - P20 - Coated) Finishing and light roughing of steel and cast steel under favorable machining conditions. Great resistance to wear permits high cutting speeds. BA 70 (P05 - P20) Finishing and light roughing of steel and cast steel. High cutting speeds, moderate feeds and favorable machining conditions. BA 55 (P25 - P45) Machining of steel, cast steel, forged steel and stainless steel in operations that require toughness. Recommended for low cutting speeds, heavy feeds and favorable machining conditions.
	P10	C7			MC 7425	BA 70	MC 7035 (P15 - P50 - Revestida) Acabamento e desbaste de aço, aço forjado, aço fundido e ferro fundido nodular com cavaco longo. Velocidade de corte elevada e avanço relativamente grande. Boa Tenacidade e resistência ao desgaste. Classe universal para usinagem de aço. MC 7425 (P01 - P20 - Revestida) Acabamento e desbaste leve de aço e aço fundido em condições favoráveis de corte. Sua grande resistência ao desgaste permite velocidade de corte elevada. BA 70 (P05 - P20) Acabamento e desbaste leve de aço e aço fundido. Elevada velocidade de corte, avanços moderados e condições favoráveis. BA 55 (P25 - P45) Para operações que requerem tenacidade na usinagem de aço, aço fundido, aço forjado e aço inoxidável, indicado para baixas velocidades, condições desfavoráveis e grandes avanços.
	P20	C6		MC 7435			MC 7425 (M15 - M35 - Recubrida) Desbaste fino y medio de acero inoxidable austenítico, laminado, forjado y fundido. Buena tenacidad, excelente resistencia al desgaste frontal y a la formación de crateras.
	P30						MC 7415 (K01 - K35 - Recubrida) Uso general en las operaciones de acabado y desbaste en hierro fundido gris, en coquilla, nodular y maleable de viruta corta. Gran resistencia al desgaste que permite un elevado volumen de arranque de viruta con velocidad de corte elevada.
	P40	C5					MC 7425 (M15 - M35 - Coated) Light to medium rough turning of rolled, forged and cast austenitic stainless steel. Good toughness and excellent resistance to flank and crater wear.
	P50						MC 7415 (K01 - K35 - Coated) General use for finishing and roughing of cast iron-gray, chilled, nodular and maleable with short chips. Great resistance to wear permits high chip loads at high cutting speeds.
M Aço, aço fundido, aço ao manganês, aço inoxidável e ferro fundido maleável. Steel, cast steel, manganese steel, stainless steel and malleable cast iron. Acero, acero fundido, acero al manganeso, acero inoxidable y hierro fundido maleable.	M10						MC 7425 (M15 - M35 - Recubrida) Desbaste fino y medio de acero inoxidable austenítico, laminado, forjado y fundido. Buena tenacidad, excelente resistencia al desgaste frontal y a la formación de crateras.
	M20			MC 7425	BG 31		MC 7415 (K01 - K35 - Recubrida) Uso general en las operaciones de acabado y desbaste en hierro fundido gris, en coquilla, nodular y maleable de viruta corta. Gran resistencia al desgaste que permite un elevado volumen de arranque de viruta con velocidad de corte elevada.
	M30						MC 7425 (M15 - M35 - Coated) Light to medium rough turning of rolled, forged and cast austenitic stainless steel. Good toughness and excellent resistance to flank and crater wear.
	M40						MC 7415 (K01 - K35 - Coated) General use for finishing and roughing of cast iron-gray, chilled, nodular and maleable with short chips. Great resistance to wear permits high chip loads at high cutting speeds.
K Ferro fundido cinzento, coquilha- do, maleável de cavaco curto. Aço temperado, metal não ferroso, plástico e madeira. Cast irons: gray, chilled and malleable with short chips, hardened steel, non ferrous metals, and non metals. Hierro fundido gris, en coquilla, maleable de viruta corta; Acero templado, metales no ferrosos, plásticos y madera.	K01	C4					MC 7425 (M15 - M35 - Coated) Light to medium rough turning of rolled, forged and cast austenitic stainless steel. Good toughness and excellent resistance to flank and crater wear.
	K10	C3		MC 7415	BG 31		MC 7415 (K01 - K35 - Recubrida) Uso general en las operaciones de acabado y desbaste en hierro fundido gris, en coquilla, nodular y maleable de viruta corta. Gran resistencia al desgaste que permite un elevado volumen de arranque de viruta con velocidad de corte elevada.
	K20	C2					MC 7425 (M15 - M35 - Coated) Light to medium rough turning of rolled, forged and cast austenitic stainless steel. Good toughness and excellent resistance to flank and crater wear.
	K30	C1					MC 7415 (K01 - K35 - Coated) General use for finishing and roughing of cast iron-gray, chilled, nodular and maleable with short chips. Great resistance to wear permits high chip loads at high cutting speeds.

BRASSINTER avança... muito! Mas preserva o idealismo de seus fundadores.

BRASSINTER never stops advancing. But at the same time preserves its founders' idealism.

BRASSINTER avanza, siempre!... Mucho! Pero conserva el idealismo de sus fundadores.

Fundada há 54 anos por professores e pesquisadores do INSTITUTO DE PESQUISAS TECNOLÓGICAS (IPT) ligado à ESCOLA POLITÉCNICA DA UNIVERSIDADE DE SÃO PAULO, a BRASSINTER já nasce com uma sólida e irreversível vocação para a investigação aplicada à metalurgia, à mecânica e ao uso de ferramentas de usinagem.

Do clima de idealismo singelo que presidiu a sua fundação, da sua exemplar ética empresarial e do pragmatismo com que atende às necessidades do seu cliente, consolida-se uma filosofia e um Know-how cujos valores a elevou à destacada posição de liderança.

Hoje, a BRASSINTER se orgulha de ser o fornecedor, e muitas vezes exclusivo, dos maiores nomes da indústria mundial e de todos os que fazem da qualidade a razão do sucesso de suas empresas.

A BRASSINTER incorpora a seus produtos o melhor da tecnologia mundial, e garantir ao cliente um produto excelente continua sendo a missão dos seus 300 colaboradores.

Então, conheça você também toda a linha! Há certamente vários produtos que, por suas características notáveis, aumentarão poderosamente sua lucratividade!

BRASSINTER was founded fifty four years ago by professors and research workers from the S. PAULO RESEARCH AND DEVELOPMENT INSTITUTE, (IPT), which is associated with the ENGINEERING SCHOOL in UNIVERSITY OF S. PAULO; thus BRASSINTER came into the world determined to research applied metallurgy and the mechanics of metal cutting processes.

A climate of dedication during its formative years set BRASSINTER on the path of professionalism, and pragmatic approaches to its clients' needs. Over the years these attitudes have become a philosophy of competence, which has made the company the leader of an important industrial sector.

Nowadays BRASSINTER is proud of being a supplier, often the only supplier, to many major users of cutting tools, for whom quality is sine qua nom.

BRASSINTER makes use of the best technology available. This in turn enables the client to guarantee the excellence of his products, and thus we define the mission of our three hundred strong team.

We invite you to inspect our product lines, some of which certainly improve your productivity.

Fundada hace 54 años por profesores e investigadores del INSTITUTO DE PESQUISAS TECNOLÓGICAS (IPT) vinculado a la ESCUELA POLITÉCNICA DE LA UNIVERSIDAD DE SÃO PAULO, BRASSINTER ya nace con una sólida e irreversible vocación para la investigación aplicada a la metalurgia, a la mecánica y al uso de herramientas de fabricación.

Del clima de idealismo sencillo que presidió su fundación, de su ejemplar ética empresarial y del pragmatismo con que atiende las necesidades de su cliente, consolidase una filosofía y un know-how cuyos valores la elevó a la destacada posición de liderazgo.

Hoy, la BRASSINTER se enorgullece de ser el proveedor, muchas veces exclusivo, de los mayores nombres de la industria y de todos los que hacen de la calidad la razón del éxito de sus empresas.

BRASSINTER incorpora a sus productos lo mejor de la tecnología mundial, y garantizar a su cliente un producto excelente continúa siendo la misión de sus 300 colaboradores.

Por eso, conozca usted también toda la línea. Hay ciertamente varios productos que, por sus características notables, aumentarán poderosamente su lucratividad.
